Sprinkler Magician Single Reservoir

21”H x 19”W x 11.5”D

(Pesticide/animal repellent functions)

Sprinkler Magician Double Reservoir

21”H x 19”W x 11.5”D

(Pesticide/animal repellent & fertilizing functions)

Gallon Bottle

Mosquito Magician

1 gallon treats a small yard (<3000 sq. ft.) twice a week for 8-10 weeks, a medium yard (4000 sq. ft.) twice a week for 6-8 weeks, or a large yard (6000 sq. ft.) twice a week for 4-6 weeks.

RAVING REVIEWS:

For once in my life, I'm not getting bit. I can sit outside by the pool, grill or just sit in the sun, and the mosquitoes aren't there! I am happy. There are no mosquitoes in my yard or my house. I also like the fact that the ingredients are organic and all-natural because I care about health. I have five grandkids that can finally play in my yard, mosquito-free and poison-free.

-Dr. David Minkoff

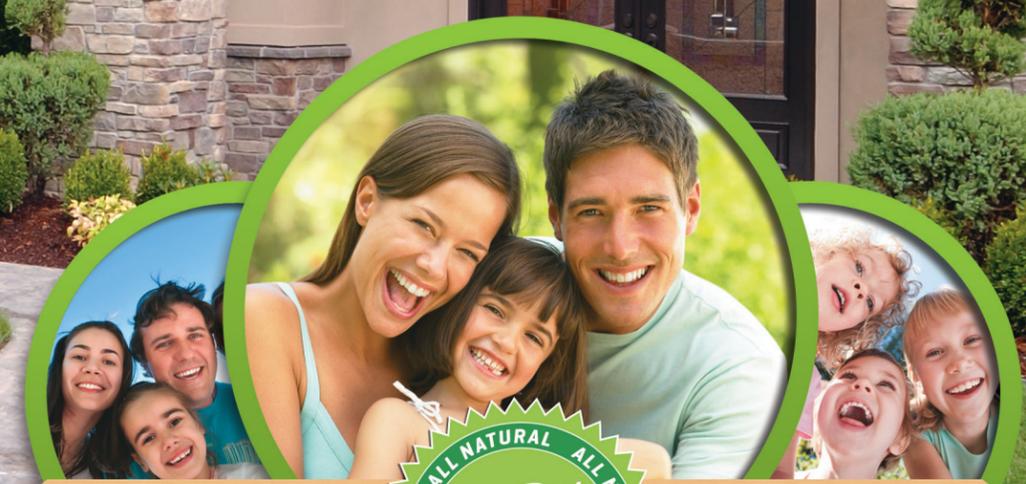

We had an outdoor party last summer and guests kept commenting how they weren't getting bitten by mosquitoes. What's really great too is that the Sprinkler Magician is automatic, so I never have to think about it or worry about whether or not I turned it on. It just goes on its own and gives me a mosquito-free yard!

SPRINKLER MAGICIAN™

Biting Pest

Elimination

Use Your Sprinkler System to Eliminate Pests!

What is Sprinkler Magician?

Sprinkler Magician is a patented, proprietary natural pest control system that uses existing irrigation systems to kill and repel biting insects in residential and commercial properties. The system eliminates mosquitoes and other pests where they hide – in plants and lawns – using a potent natural concentrate. The Mosquito Magician concentrate is 100% safe for families, pets and the environment. The Sprinkler Magician system can also deliver a wide range of concentrates to repel animals such as deer, snakes, scorpions, rabbits, etc.

There is no other system that offers these benefits, and Sprinkler Magician is very proudly made in the USA.

How does it work?

The machine hooks up to your existing sprinkler system and automatically disperses the organic concentrate across your yard at appropriate intervals. A high-pressure pump injects the concentrate into the water stream so that it spreads evenly on all your plants and lawn. The system can be set to run preset schedules each week, or on demand.

Upgrades

Remote Control

There is an optional wireless remote control that allows you to start a pest treatment cycle any time you want at the click of a button from anywhere on your property.

Fertilizing Your Garden

In addition to treating plants and lawns for biting pests, the Sprinkler Magician system can also (optionally) dispense liquid fertilizer to gardens and lawns. This is a great way to fertilize, giving complete coverage and a lush, green lawn using 100% natural fertilizer through your sprinkler system. Studies show that liquid fertilizing is more effective and environmentally responsible than other methods.

Commercial Models

We can supply models to suit commercial, resort and horticultural applications. These are custom built according to the property requirements. They can even include multiple systems that wirelessly daisy chain together to cover large properties with multiple irrigation systems.

Other Products

We are currently developing some very different pest control solutions for residential applications that do not need an irrigation system as a prerequisite.

We offer a dual reservoir model that also distributes fertilizers to lawns and gardens too!

Sprinkler Magician is Effective Against These Pests

Mosquito Magician

Currently Sprinkler Magician supplies a powerful natural concentrate called “Mosquito Magician.” The concentrate has all natural ingredients but unlike many of our competitors we use no less than 6 active ingredients. Our concentrate is effective on the following insect pests:

Mosquitoes

Mites

Chiggers

Lawn Grubs

No-see-ums

Silverfish Crickets

Spiders

Fire Ants

Moths

Flies

Ticks

Chinch Bugs

Gnats

Fruit Flies

Palmetto Bugs

Concentrates for Other Pests

Sprinkler Magician is currently developing and testing concentrates that are designed to repel other animals that may be pests in certain areas. For example we are getting extremely good results with an all-natural Deer repellent currently being tested in the New Jersey area.

Deer

Snakes

Scorpions

Fertilizer Magician

We have our own natural Fertilizer Magician liquid fertilizer for use with our dual reservoir models. This is an economical and very effective way to automatically fertilize your lawns and gardens.

Remember that the Sprinkler Magician system is a DELIVERY SYSTEM that can be used to deliver any Sprinkler Magician liquid based product to kill or repel any pests and also to administer fertilizer to part or all of the lawns and gardens.
